

Did you know?

Government advice to turn your child forward facing in the car at 9 months is putting their life at risk. In other European countries, children stay in rear facing car seats until they are 4 years old.

Did you know?

British car seat manufacturers are refusing to sell their safest products in the UK because they've decided that British parents don't want them. They export the seats to Scandinavia but will not make them available here.

Did you know?

Rear facing stage 1 seats are 5 times safer in a frontal collision. They protect the neck and head by distributing the force along the back of the seat and are much more effective at protecting internal organs.
